UrbanKart

End-to-End E-Commerce Analytics

A comprehensive data-driven analysis of sales performance, customer behavior, product inventory, and post-purchase experience across UrbanKart's operations.

Project Objectives

Four dashboards evaluate UrbanKart's performance across key business dimensions.

Executive Dashboard

Revenue, geographic distribution, category mix, and acquisition channels

Customer Analysis

Demographics, retention, acquisition, and lifetime value

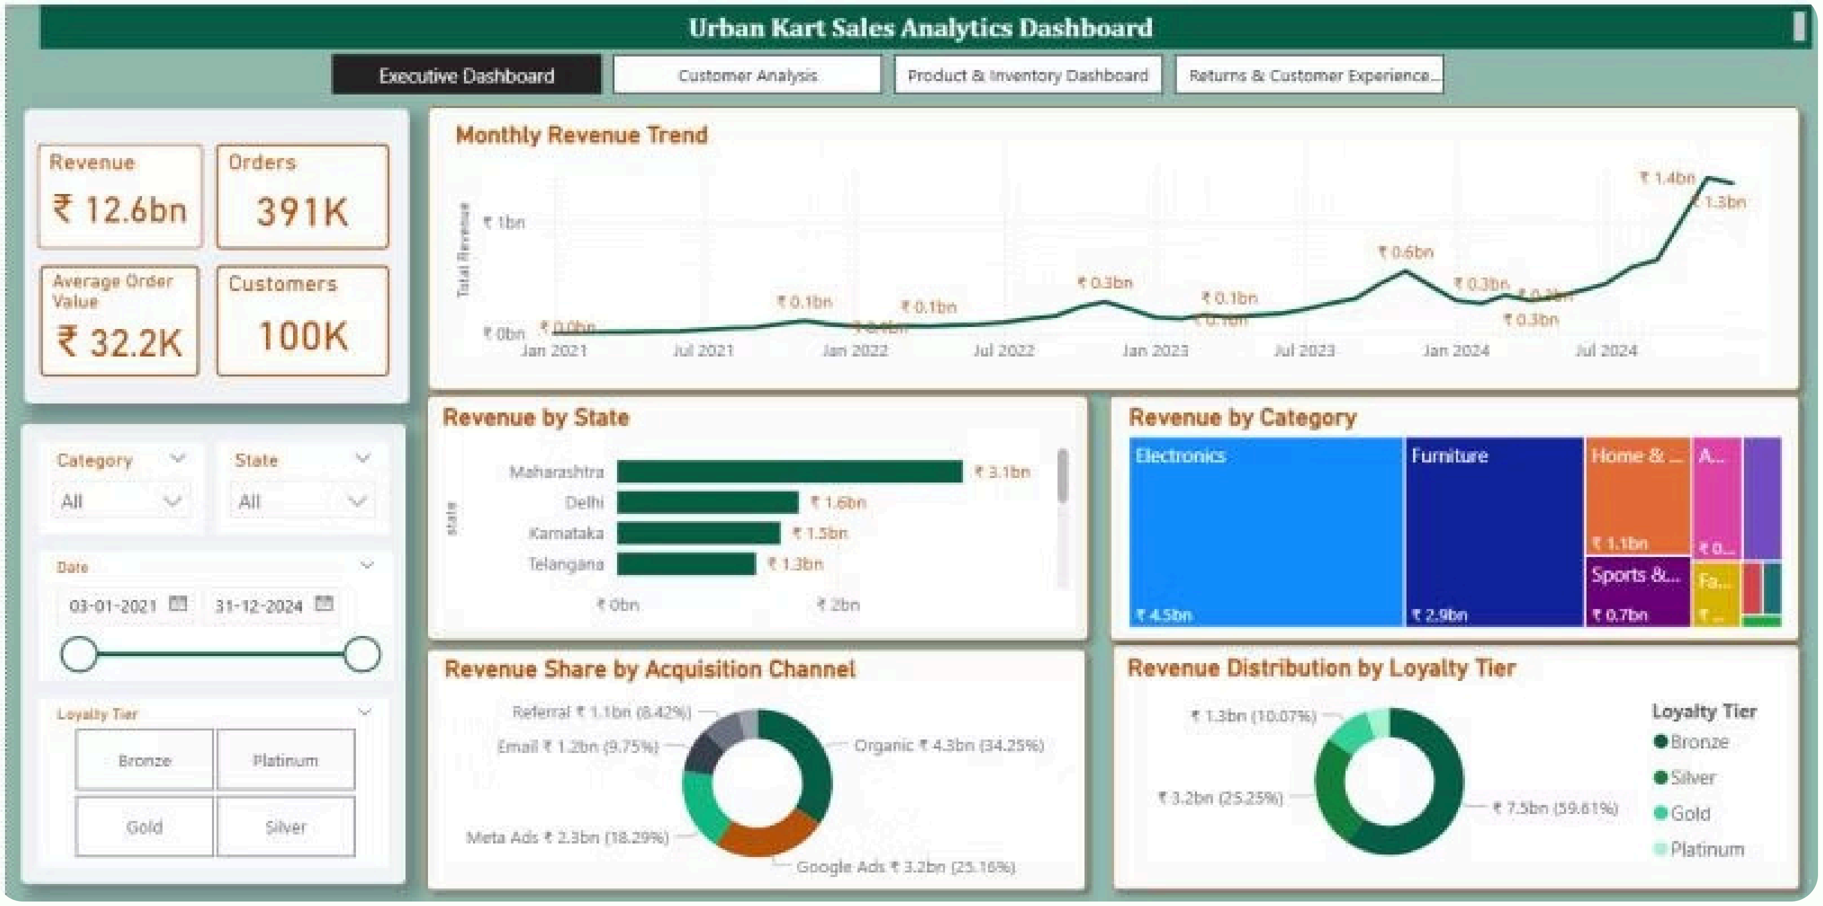
Product & Inventory

Sales volume, stock health, supplier performance, warehouse distribution

Returns & CX

Return rates, reviews, shipping outcomes, payment preferences

Executive Dashboard — Key Metrics



₹12.6bn

Total Revenue

391K

Orders

₹32.2K

Avg Order Value

100K

Customers

Revenue surged after July 2024, reaching ₹1.4bn. Maharashtra (₹3.1bn), Delhi (₹1.6bn), and Karnataka (₹1.5bn) lead geographically. Electronics (₹4.5bn) and Furniture (₹2.9bn) dominate categories. Organic (34%) and Google Ads (25%) top acquisition channels. Bronze tier contributes 60% of loyalty revenue.

Executive Dashboard — Strategic Recommendations

Expand Electronics & Furniture

Deepen SKU range and cross-sell

Strengthen Peak Operations

Scale inventory and staffing before demand surges

Invest in SEO & Google Ads

Organic leads revenue; shift budget toward search

Diversify Geography

Target UP, Rajasthan, MP, and West Bengal

Grow Books, Beauty & Fashion

Test promotions and bundles

Advance Loyalty Tiers

Milestone rewards to move Bronze up

Expected impact: 5 - 8% revenue growth, lower CAC, higher CLV, reduced concentration risk.

DASHBOARD 2 OF 4

Customer Analysis — Demographics & Behavior

Ages 25-34 lead (36K), followed by 35-44 (31K). Gender split: 52% male, 46% female. Top 10 customers each generated ₹1.8M-₹2.2M. Organic (34.73%) and Google Ads (25.09%) drive acquisition. Signups peak in Jan, May, Aug, and Dec.

204K Repeat Customers

55% placed multiple orders

₹125.9K Avg Spend

Strong lifetime value

95K Active

Continued engagement

Customer Analysis — Recommendations

Personalized Loyalty Campaigns

Exclusive rewards and early access for high-value customers

Automated Retention

Re-engage inactive customers via email and app notifications

Strengthen SEO

Organic is the largest acquisition source

Optimize Google Ads

Focus on high-value keywords and audiences

Expand 25–44 Targeting

Largest segment; deepen assortment and promotions

Target 45+ Demographic

Trust-focused campaigns and simplified UX

Expected impact: higher retention, increased CLV, improved marketing efficiency, and market expansion.

Product & Inventory — Performance Overview

1,892

Active Products

977K

Units Sold

₹6.7bn

Inventory Value

94%

In Stock

Tata Coffee XL leads volume (918 units); premium electronics drive highest revenue. Electronics (₹3.06bn) and Furniture (₹1.77bn) hold 72% of inventory value. Nayak Mitter Distribution tops suppliers (₹0.37bn). Lucknow warehouse holds the most stock, followed by Mumbai. Only 167 products (5%) are low-stock.

Product & Inventory — Recommendations

Replenish Low-Stock SKUs

Prioritize 167 low-stock products

Scale Electronics Inventory

Forecast demand to avoid overstock

Diversify Suppliers

Reduce reliance on Nayak Mitter Distribution

Review Warehouse Allocation

Align stock with regional demand

Automate Inventory Alerts

Trigger replenishment by sales velocity

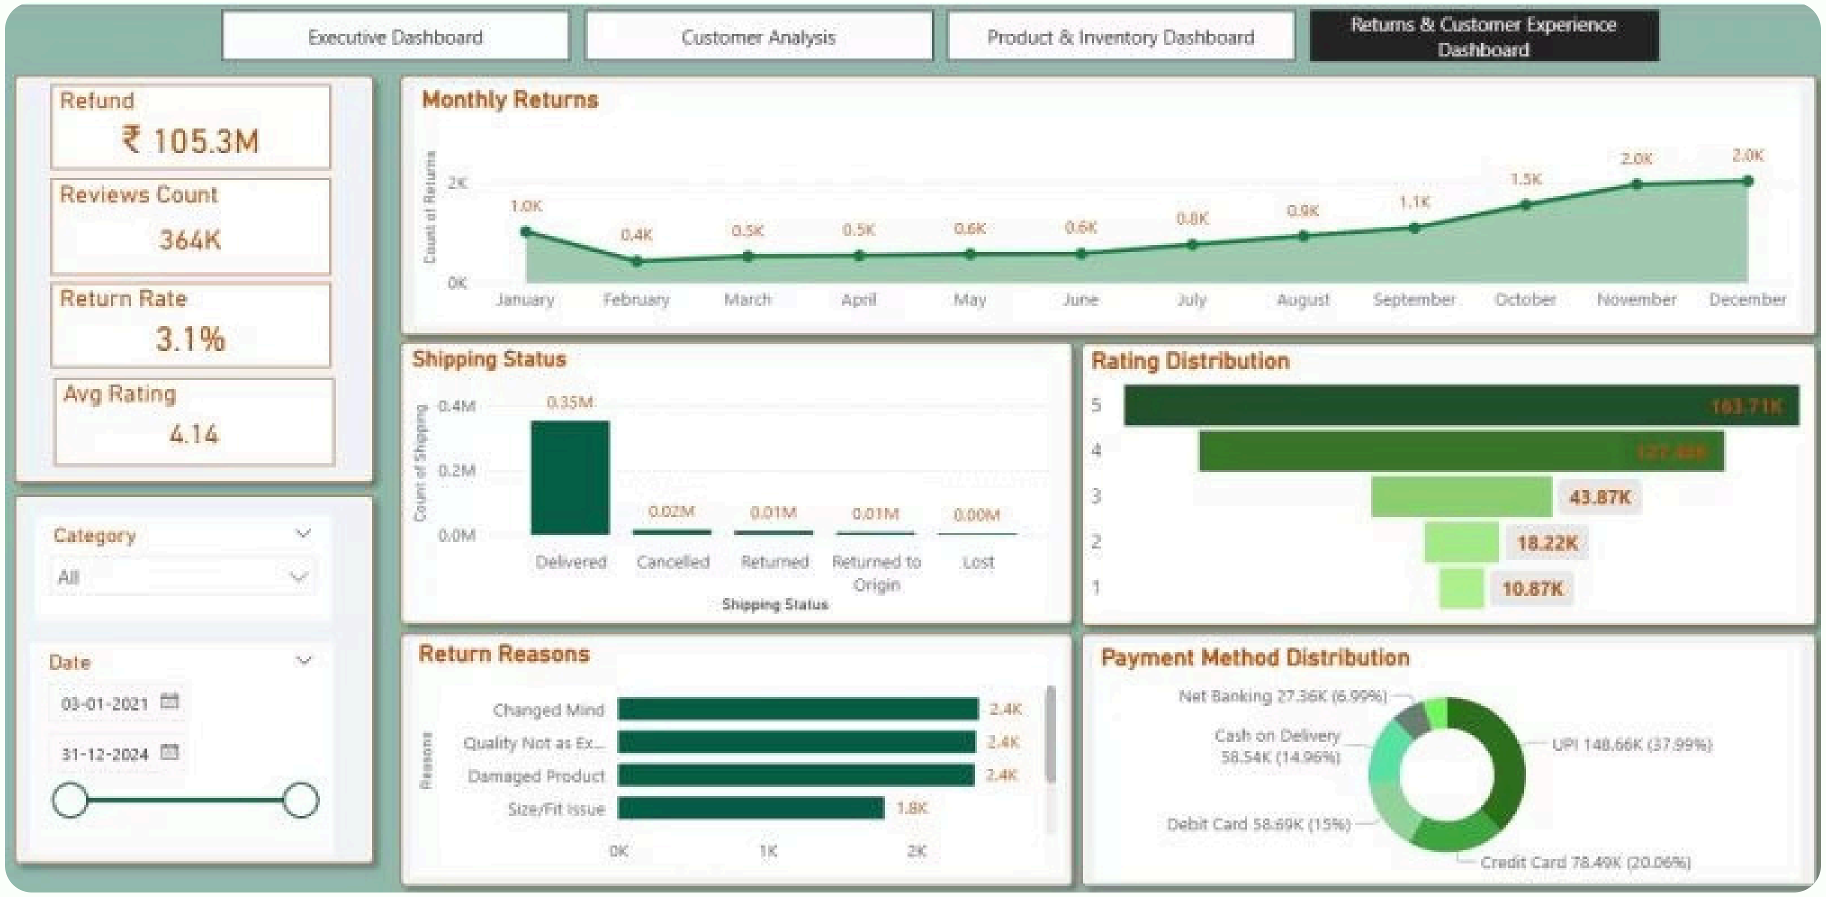
Separate Premium Monitoring

Track high-revenue products separately

Expected impact: improved availability, higher revenue, lower supply chain risk, and reduced holding costs.

DASHBOARD 4 OF 4

Returns & Customer Experience — Key Findings



₹105.3M

Total Refunds

3.1%

Return Rate

4.14

Avg Rating /5

364K

Reviews

350K orders delivered successfully. UPI dominates payments (48.66%), followed by Credit Card (20.06%) and Debot Card. Top return reasons: Changed Mind, Quality Issues, Damaged Product (2.4K each). Returns peak in Nov-Dec alongside sales. 5-star reviews lead (193.7K), with 4-star at 127.5K.

Returns & CX — Recommendations

Strengthen Quality Assurance

Focus on categories with recurring quality returns

Improve Protective Packaging

Reduce damaged-product returns

Scale Reverse Logistics

Expand capacity before festive seasons

Optimize UPI & Digital Payments

Prioritize UPI reliability and adoption

Collect Post-Return Feedback

Track issues by product, supplier, and category

Proactive Support for High-Value Orders

Reduce returns from unmet expectations

Expected impact: higher satisfaction, lower operational costs, increased profitability, stronger brand reputation, and more efficient operations.
